DETAILED ACTION

This communication is responsive to amendment, filed 09/03/04.

Claims 1, 4-16, 19-34 are pending in this application. In the Amendment, claims 2-3 and 17-18 were cancelled, claims 19-34 were added, and claims 1, 6, 7, 9, and 12 were amended.

Applicant's amendment necessitates the restriction requirement as in the following.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1, and 4-6, drawn to Subject matter wherein, when a window displays only part of its related information, the user can selectively control which portion is displayed, classified in class 715, subclass 784.

Group II. Claims 7-8, and 31-33, drawn to data transfer between objects, classified in class 715, subclass 769.

Group III. Claims 9-11 and 12-16, drawn to display elements are based on user's profile or preference setting, classified in class 715, subclass 789.

Group IV. Claims 19-22, and 34, drawn to orientation/displacement of display elements, classified in class 715, subclass 700.

Group V. Claims 23-30, drawn to on screen workspace or object, classified in class 715, subclass 764.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I, II, III, IV, and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

Art Unit: 2174

shown to be separately usable. In the instant case, invention Group I has separate utility such as the user can selectively control the flow of consecutive lines of data, invention Group II is directed toward subject matter wherein data is move from one location on the screen to another screen by dragging, invention Group III is directed to subject matter wherein the display is selectively display information based on user profile or preference setting, invention Group IV is directed toward orientation/displacement of display elements based on user or personnel position at the screen, invention Group IV is to providing a specific display elements in an interface which the user can interact. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

A telephone call was made to Anne E. Barschall on 12/08/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
